## RELEVANT WORK EXPERIENCE

### **Self Employed**

Front End Developer & Web Designer

September 2019 — Present

- Work with clients to build brand identity
- Create website mockups in Photoshop and Figma
- Develop responsive websites using HTML5, CSS3/SCSS, JavaScript and jQuery
- Ensure fast performance by optimizing and serving media in multiple formats
- Use SEO to ensure the client's websites are easily found
- Utilize Google Analytics to provide client with user traffic metrics for their site

### **All In Films**

Assistant

February 2017 – May 2017

- Modified and edited company's Wordpress site.

## PROJECTS

- **Tricking Combo Generator**
  - Technologies: HTML, CSS, JavaScript, Webpack
  - I used MVC along with OOP to organize my code base.
  - I wrote an algorithm that generates combinations of tricks and transitions from the sport called tricking.
  - I created multiple CSS animations to make the app transitions smooth and user interaction more fluid.
- **Interactive Weather Map**
  - Technologies: HTML, CSS, JavaScript, Google Maps API, Google Geocoding API, Open Weather Map API
  - I used a combination of APIs to create an interactive map that users can click on to get current weather data in that location.
  - I utilized AWS serverless Lambda functions and environment variables to hide my API key so that it couldn't be seen in the browser.
- **Nicole's 3D Virtual Tours**
  - Technologies: HTML, CSS, JavaScript, jQuery, Webpack
  - I used BEM methodology to organize my CSS.
  - I lazy-loaded images so that web pages would load faster.
  - I created a custom build process to concatenate my files and minify my code.
  - I wrote a script to convert images to webp to serve to compatible browsers.
  - I made responsive iframes, multiple image and video carousels, and popups.
  - I created an accordion menu and dynamically paginated data to reduce scroll on long web pages.

## TECHNICAL SKILLS

- |                                   |                             |
|-----------------------------------|-----------------------------|
| • HTML5                           | • Wordpress                 |
| • CSS3/SCSS                       | • OOP                       |
| • JavaScript (Node.js, jQuery)    | • Unit Testing (e.g. Mocha) |
| • React                           | • Wireframing               |
| • Express                         | • Adobe Photoshop           |
| • Version Control (e.g. Git)      | • Prototyping (e.g. Figma)  |
| • CSS Frameworks (e.g. Bootstrap) | • Adobe Illustrator         |
| • MongoDB                         | • Responsive Web Design     |
| • Mongoose.js                     | • UI/UX Design              |

## EDUCATION

California State University, Los Angeles

BA Television, Film and Media Studies, June 2016

2013 - 2016
